Summary

Backend Engineer with 3 years of experience designing APIs, caching systems, and CMS integrations. Focused on backend reliability, caching performance, and deployment automation using Linux and Docker environments.

Key Skills

- **Languages:** Python, JavaScript
 - **Frameworks:** Flask, Next.js, React
 - **Data & Caching:** Redis, MongoDB
 - **Infra & DevOps:** Docker, Ansible, Apache2, uWSGI
 - **Architecture:** REST APIs, caching layers, CI/CD automation, deployment workflows
 - **Templating:** Jinja2, HTML/CSS
 - **Other:** Linux server management, Docker Compose, system monitoring
-

Experience

Vtiger — Software Developer

Bengaluru · Jan 2022 – Present

- Designed and maintained **Flask microservices** integrating **Prismic CMS** with internal APIs.
 - Built **Redis caching** that reduced CMS content latency by ~50%.
 - Added **MongoDB-backed API caching** improving backend response consistency.
 - Developed **health-checks** and monitoring utilities to improve uptime visibility.
 - Built and deployed an internal **Next.js + Prismic CMS** website for company blogs, enabling slice-based templating and dynamic content rendering.
 - Refactored **Jinja2 templates** to improve modularity and reusability.
 - Automated deployments using **Apache2 + uWSGI** and **Ansible**, ensuring consistent releases.
 - Created internal CMS tooling for non-developers to manage website content efficiently.
